Other Income (Child support, social security, military retirement, etc.)			
TOTAL GROSS/NET INCOME			

Step 1

Step 11 Step 12

Step 3

Step 2

Steps 4 & 5

Steps 6 & 7

Step 8

Steps 9 & 10

Creating an Effective Personal Budget

Step 1

In Table 1, fill in the estimated dollar amount that you spend on Essential Monthly Expenses in the column labeled "Current Spending." Use the blank lines to describe additional expenses that are not already on the list.

Step 2

Add the total of all of your Current Essential Monthly Expenses in the Total Essential Monthly Expenses row (first column)

Step 3

In Table 2, fill in the estimated dollar amount that you spend on other monthly expenses in the column labeled "Current Spending." Use the blank lines to describe additional expenses that are not already on the list.

Step 4

Add the total of all your other monthly expenses number from Table 1 in the Total essential monthly expenses row in Table 2 (first column)

Step 5

Write the total essential monthly expenses number from Table 1 in the total essential monthly expenses row in Table 2 (first column)

Step 6

At the bottom of Table 2, add the total other monthly expenses and the total essential monthly expenses to get **Total Living Expenses**

Step 7

Copy the Total Living Expenses number into the Total Monthly Expenses blank in the formula

Step 8

Calculate your **Monthly Gross and Net Income**. Your Net income is your income after income taxes and other withholdings, like 401k, are deducted.

Step 9

Copy the Total Net Income number into the Total Net Monthly Income blank in the formula

Step 10

Using the formula, subtract Total Monthly Living Expenses from Total Net Monthly Income. If the number is **positive**, they you are living within your budget and should consider investing the "excess" money in a saving account, money market, or other investment option, or payoff outstanding debts. If the number is **negative**, then you are spending more than your income allows.

Step 11

Review each line in Tables 1 & 2. Determine if you can save additional money by reducing certain expenses, especially those in Table 2. Write these reductions in the necessary changes column. You may be surprised just how much money you find without adding any new income.

Step 12

Write the new values for your monthly expenses in the planned budget columns of Tables 1 & 2 and calculate your Planned Budget. Your Planned Budget represents your goals for next month. Monitor your expenses, and at the end of the month compare them with your budget. Make modifications to your budget as necessary.

Congratulations on taking your first step to better money management!
